## REACH Compliance Statement update

11/03/2016

Magnet Sales and Service Ltd are committed to operating in an environmentally, socially and ethically responsible manner, which includes complying with the requirements of REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), which came into force on 1<sup>st</sup> June 2007 in the EU, and is regulated by the European Chemicals Agency (ECHA). Its purpose is to reduce the risk of harmful effects that the use of chemical substances can cause to human health and the environment.

There are currently 168 Substances of very high concern (SVHC), the candidate list last updated on 08/02/16 by ECHA.

Magnet Sales and Service Ltd have audited their products and processes and that of their suppliers against the updated priority list and can confirm that none of the substances / entries are used in the manufacture of our products greater than 0.1% by weight, in quantities above one ton per year, and do not involve the intentional release of substances of very high concern.

We will continue to monitor updates of the candidate list of SVHCs by ECHA and audit our procedures accordingly.

A D Lobb  
Managing Director
